The Complete Church Organ

Performance, Quality, Versatility and Prestige

The role of music in worship can hardly be understated, and the organ has been the primary instrument in churches throughout history. Laurens Hammond invented his organ over 75 years ago as a low-cost alternative to a pipe organ, and today's Model 935 continues that idea. As the Church introduces more and more modern music into its service, a more versatile organ is needed.

Closing and Locking Top provides protection for your instrument in public places.

Model 935

Features

HAMMOND HARMONIC DRAWBARS

The Hammond harmonic drawbars are the cornerstone for the famous and very recognizable "Hammond Sound". The wide range of pure harmonic tones, offered on both the upper and lower manuals, permit almost infinite tone combinations

INFORMATION CENTER

The Information Center is located on the left side of the lower manual. The Center is used to select Advanced Features such as Drawbar and Preset

Characteristics, facilitates the playing or recording of a song (via the disk drive), and recording of load Settings data. In addition, the Characteristics of various functions of the organ can be changed such as Pipe Tonal Characteristics. Extra Voice selections, etc.

MIDI

The Hammond 935 Classic Organ has the most powerful MIDI implementation to be found on a church organ. The 935 can perform in any MIDI environment. SEND and RECEIVE channels are programmable. and the manuals can be "mapped" to selectively play the internal voices or voices from a connected MIDI device

PERCUSSION EFFECTS

Touch Response Percussion gives the player the ability to alter the percussion effect by the way the key is pressed. Touch tabs are provided for Second and Third Harmonic percussions. Fast

Decay, and Percussion Soft effects.

TONAL RESOURCES

The resources of a traditional pipe organ are represented on the Hammond 935 Classic Organ, with a wealth of organ voices very carefully chosen and voiced to give the distinctive "American organ" sound. All four families of organ tones are represented, enabling every type of classical organ literature to be rendered exactly as written. In addition, a full selection of orchestral voices such as Grand Piano, Strings and Choir is included to allow the rendering of contemporary orchestral arrangements.

PRESET

Thirteen Combination Presets x six Banks are available for Swell. Great and Pedal divisions for each of four different organists. These presets can be easily programmed with your own settings.

DISK DRIVE

the right side of the organ. The disk drive is used to record and playback songs and to store preset banks. In addition, the drive can be used to read and playback General MIDI sound disks.

Leslie-Ready Housed in a beautiful

matching oak finish cabinet, is especially designed to enhance the sound of the Hammond 935 Classic Organ. The rotors can be operated in three modes -Fast (Tremolo) Slow (Chorale)

Off (Stop) Leslie 525 and 971 Oak finish

Hammond's Praise and Worship Organ

The New A-405 has all the traditional Hammond features plus 880 modern orchestral, synth, percussion and piano voices. The A-405 features a high-quality built-in sound system that will more than adequately fill a small church or chapel, with an onboard advanced digital LESLIETM system that services the Drawbar voices. The A-405 has a locking keyboard cover.

The Model 920 shares all the sonic features of the A-405, except a 13-note pedalboard, slightly smaller on-board sound system, and no locking keyboard cover. Both Organs are priced so that any Church can afford true Hammond

A-405 / 920

Features

HAMMOND HARMONIC DRAWBARS

The A-405 and 920 organ contain one set of nine adjustable drawbars for each manual. In addition, two adjustable drawbars are provided for the pedals. The Hammond Harmonic Drawbar is the cornerstone for the famous and recognizable "Hammond Sound."

PERCUSSION EFFECTS

Touch Response Percussion provides the ability to alter the percussion effect by the way the key is pressed. Toucl

way the key is pressed. Touch tabs are provided for Second and Third Harmonic Percussions, Fast Decay, and Percussion Soft effects.

PRESETS

Nine programmable Presets are available for Swell, Great, and Pedal Divisions. These Presets can easily be programmed with your own settings.

EXTRA VOICE

The A-405 and 920 models feature an EXTRA VOICE division consisting of 880 high-quality voice that include realistic Pianos, Electric Pianos, Orchestral voice (String/Wind/Pass), Synth, and Percussion/Drum kits. Extra Voice selections are saved in the combination presets, and you can toggle the Extra Voices to sound on the Upper, Lower and Pedal keyboards from the three touch tabs on the drawbar rail.

MIDI

The A-405 and 920 organ can perform in virtually any MIDI environment. SEND and RECEIVE channels are programmable. The manuals can be "mapped" to selectively play the internal voices or voices from a connected MIDI device.

CF CARD

The Compact Flash card is used to record and store personal preset banks or complete performances as well as the playback of Standard MIDI data files (SMF).

HAMMOND CHORUS-VIBRATO

A pair of touch tab switches are provided to turn the Chorus Vibrato On or Off on either the swell or

great manuals, or both. A six-position rotary control provides three degrees of Vibrato (V1-V3) and three degrees of Chorus (C1-C3).

INFORMATION CENTER

The Information Center allows the changing and editing of the organ's software parameters such as Sustain length, Drawbar voicing, MIDI parameters, and other advanced functions.

PITCH BEND & MODULATION WHEEL

The Pitch Bend Wheel allows you to raise or lower the pitch of the drawbars and Extra Voices up to 12 half steps. The Modulation Wheel is used to add Modulation to Extra Voices and to

send MIDI Data to a connected MIDI device.

LESLIE READY

The model 525 and 971 Leslie Speaker has been designed to enhance the sounds of the A-405 organs. The rotors can be operated in three modes -

Fast (Tremolo) Slow (Chorale) Off (Stop) Red Walnut finish
